

# INDUSTRIAL MECHANICAL BUZZERS

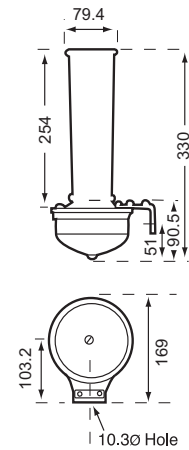

## Acoustic Signals Industrial Marine Buzzer > ABHF8 Series

### Product overview

The ABHF8 Series buzzer is a weatherproof signalling horn designed for both industrial and light marine applications. Producing a high output penetrating sound, it is particularly suitable for use on small boats and

canal barges as well as for industrial uses such as time signalling and process control alarms. The buzzer offers a wide voltage range and is contained within a brass enclosure suitable for corrosion environments.

### Features

Industrial/marine buzzer

High output penetrating sound

111dB @ 1m

Rated 15 min On / 1 min Off

IP65

### Material

Brass
