

Visual Signals XENON

BEACONS

Industrial Xenon Beacons > X250 Series

Product overview

The X250 Series utilises a discharge capacitor and converter circuit to ignite xenon gas inside a tube, resulting in a brilliant flash of light. Xenon gas ignites virtually instantaneously so maximum brightness is obtained immediately. Xenons

have an added advantage of low current consumption combined with a reasonable life span. The X250 Series provides a 360-degree light output and is rated at IP67 making it ideal for marine applications. It also has built-in vibration protection making it suitable for machinery and plant where excessive vibration is evident. Xenon beacons are one of the most efficient, effective and brightest visual signals available.

Features

- Continuously rated
- Suitable for surface or wall mounting
- Optional wall bracket & protective guard available – see accessory page
- Three-point fix external
- Anti-vibration protection built-in
- Ideal for areas of high vibration
- 360° visibility
- IP67

Material

- UV Stable Polycarbonate Lens
- UV Stable ABS Plastic Base
