

Acoustic Signals - Industrial

PIEZO BUZZERS

Acoustic Signals Piezo Buzzers > AE50M Series

Product overview

The AE50M Piezo Buzzer is ideal for use as a vehicle reversing alarm or general signalling device. The compact and rugged design offers IP67 protection, a wide operating voltage, high sound output and a Continuous Tone as standard.

The unit comes complete with a mounting bracket and 300mm flying leads for quick and easy termination & installation.

Wiring Connections:

Red Lead = +V, Black Lead = -V

AE50M Series > Ordering Information

Code No:	Voltage:	Frequency:	Current:	dB:
AE50M-02	6-30VDC ---	2800 Hz	45 mA	105

- Current Draw of 45 mA is taken at 12VDC
- Current Draw at 24VDC = 80 mA

Frequency +/- 500 dB at prime voltage +/- 3dB

Features

- Continuously rated
- Economical
- Suitable for vehicle use
- Wide operating temperature
- Wide operating voltage
- Compact & rugged design
- Low current consumption
