

Audible Signals - Industrial & Marine

IP66 BELLS

Note: Moflash Bell must be mounted in this position with the solenoid striker in the upright position. (see top diagram above)

Acoustic Signals > Industrial & Marine-IP66 Series

Product overview

The new range of 6" & 8" Solenoid driven Bells have been designed and manufactured to withstand harsh environmental conditions, ideally suited for heavy duty industrial & marine applications where rugged construction and a high weatherproof classification is required.

The Bells produce a rich and clear 'traditional' alarm Bell sound, free from mechanical clatter.

The design allows for up to 4 x M20 cabling entry knockouts, two from above & one on either side to allow for loop in/loop out cabling applications. Termination is inside the enclosure and caters for 4 x 2.5mm² cables. MED Marine approval pending.
